The system tailored to the university's needs

Web-based version and mobile application

Through API and micro-service creation

Software as a service supported by large higher education dedicated organization

Uni10 Student information system

Uni10 student information system is more than a repository for data storage. Our solution enables HEI staff to analyse data efficiently and to make sound teaching and managerial decisions on its basis. Uni10 supports the efficient management of the teaching process at the university – from student enrolment, progression and retention through timetabling, budgeting and settling teaching activities to reporting within and outside the organization.

Front-office processes supported:

- Outreach
- Recruitment
- Student payments
- Enrolment
- Onboarding
- Financial support
- Student ID cards
- Accommodation
- Meals management
- Teaching
- Support
- Surveys
- Progression
- Retaining
- Graduating
- Job placement
- Alumni relations

Back-office processes:

- Defining and maintaining of an academic structure
- Sites management
- Academic calendar management
- Curriculum management
- Intake planning
- Staffing / HR
- Timetabling
- Teaching costs planning & settling

Universal features:

- Data protection for security and privacy
- Rights and permissions
- Reports
- Printouts
- Communication tools

The logo for PCG Academia, featuring the company name in a bold, white, sans-serif font against a dark red background.

Global consulting company

Financial and organizational stability as well as an involved owner. Guarantee of continuous development inspired by the global trends on the education market. 2000 consultants, including 200 in Poland.

Proven partner for Universities

60 supported universities, processing of data of almost half a million students. Proven skills to integrate and analyse data from LMS and ERP systems available on the market. Strategic partner of the Polish Rectors Foundation and of Kozminski University. Creator of LUMEN award, conferences and portal.
